CONTACT

Hi, I created this portfolio so you can see what I have been doing for the last 3 years. I worked in different environments so one of my skills is adaptation, yes I can adapt to the work flow easily.

In this portfolio you'll see a variety sets of skills, you'll see projects that come to life, like an orthopedic company, a metal/laser company, an health/outdoor sport app, a pet accessories brand and a few more things.

I tried to create a design that shows the brand intention and philosophy because I like to create stuff that makes people feel that was created for them.

This is my portfolio, it's a work in progress, because there is always something that can be improved or added.

BOWND

BOWND is a brand of pet accessories such as collars and leashes, but more than that, it's a lifestyle brand and an extension of ourselves.

It is contemporary and innovative and aims to connect and create a bound between the product, the owner and the pet.

gps

UI/UX case study.

The purpose of an app is to be attractive and functional for the user. With that in mind, I decided to create a modality that would allow not only the user to use the application to move around, but also to interact with the spaces present on the map.
